DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 4, 5, 7, 8, 10, 11, 14, 15 and 17 are drawn to automatically storing a copy of the disk contents in memory upon detecting the insertion of the disk in the disk drive, classified in class 706, subclass 62.
 - II. Claims 3, 6, 9, 12, 13, 18 and 19 are drawn to automatically ejecting the disk during shut down, classified in class 711, subclass 4.
2. The inventions are distinct, each from the other because:

Each is directed to separate invention.
3. Inventions group I and group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because automatically storing a copy of the disk contents in memory upon detecting the insertion of the disk in the disk drive is different invention from ejecting the disk during shut down. The subcombination has separate utility such as ejecting the disk during shut down.

Art Unit: 2121

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Davis whose telephone number is (571) 272-3683. The examiner can normally be reached on Monday through Thursday from 8:00 am to 6:30 pm.
